CANADA IN A CHANGING CLIMATE

National Assessment Process

Call for Author Information Session

March 18, 2025

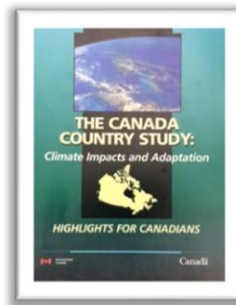

Session Agenda

1. Brief overview presentation
2. Panel discussion with former authors
3. Q&A

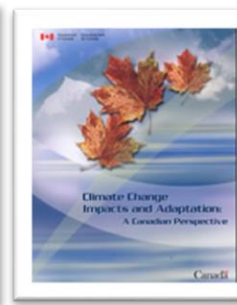

Climate change assessments inform decisions, raise awareness and build capacity

Assessments are **credible, useful and decision-relevant** products that synthesize existing knowledge on climate change risks, opportunities, and adaptation.

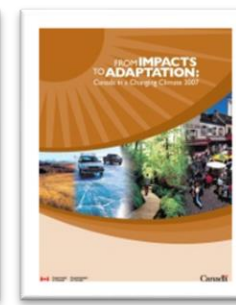

NRCan-CCIAD has been leading the assessment process on climate change impacts and adaptation since the mid-2000's.

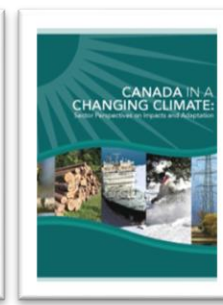

1998

2004

2007

2014

2016

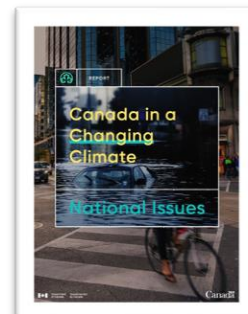

2019

2020

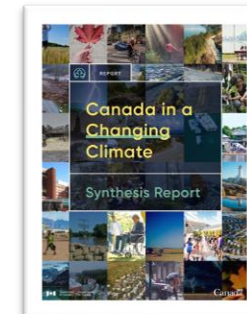

2020-2022

2021

2024

2023

How have the Assessments been used?

*“Reviewed by staff to **identify new or changing information** and to confirm that our current priorities are correct”*

*“As material in a **course on climate change** aimed at informing policy makers”*

*“The information was used to complete a program and operational **vulnerability analysis**, to incorporate risk in the corporate risk profile and to develop initiatives to manage risks.”*

*“Provided references to specific chapters in information **notes to the Minister and working groups**”*

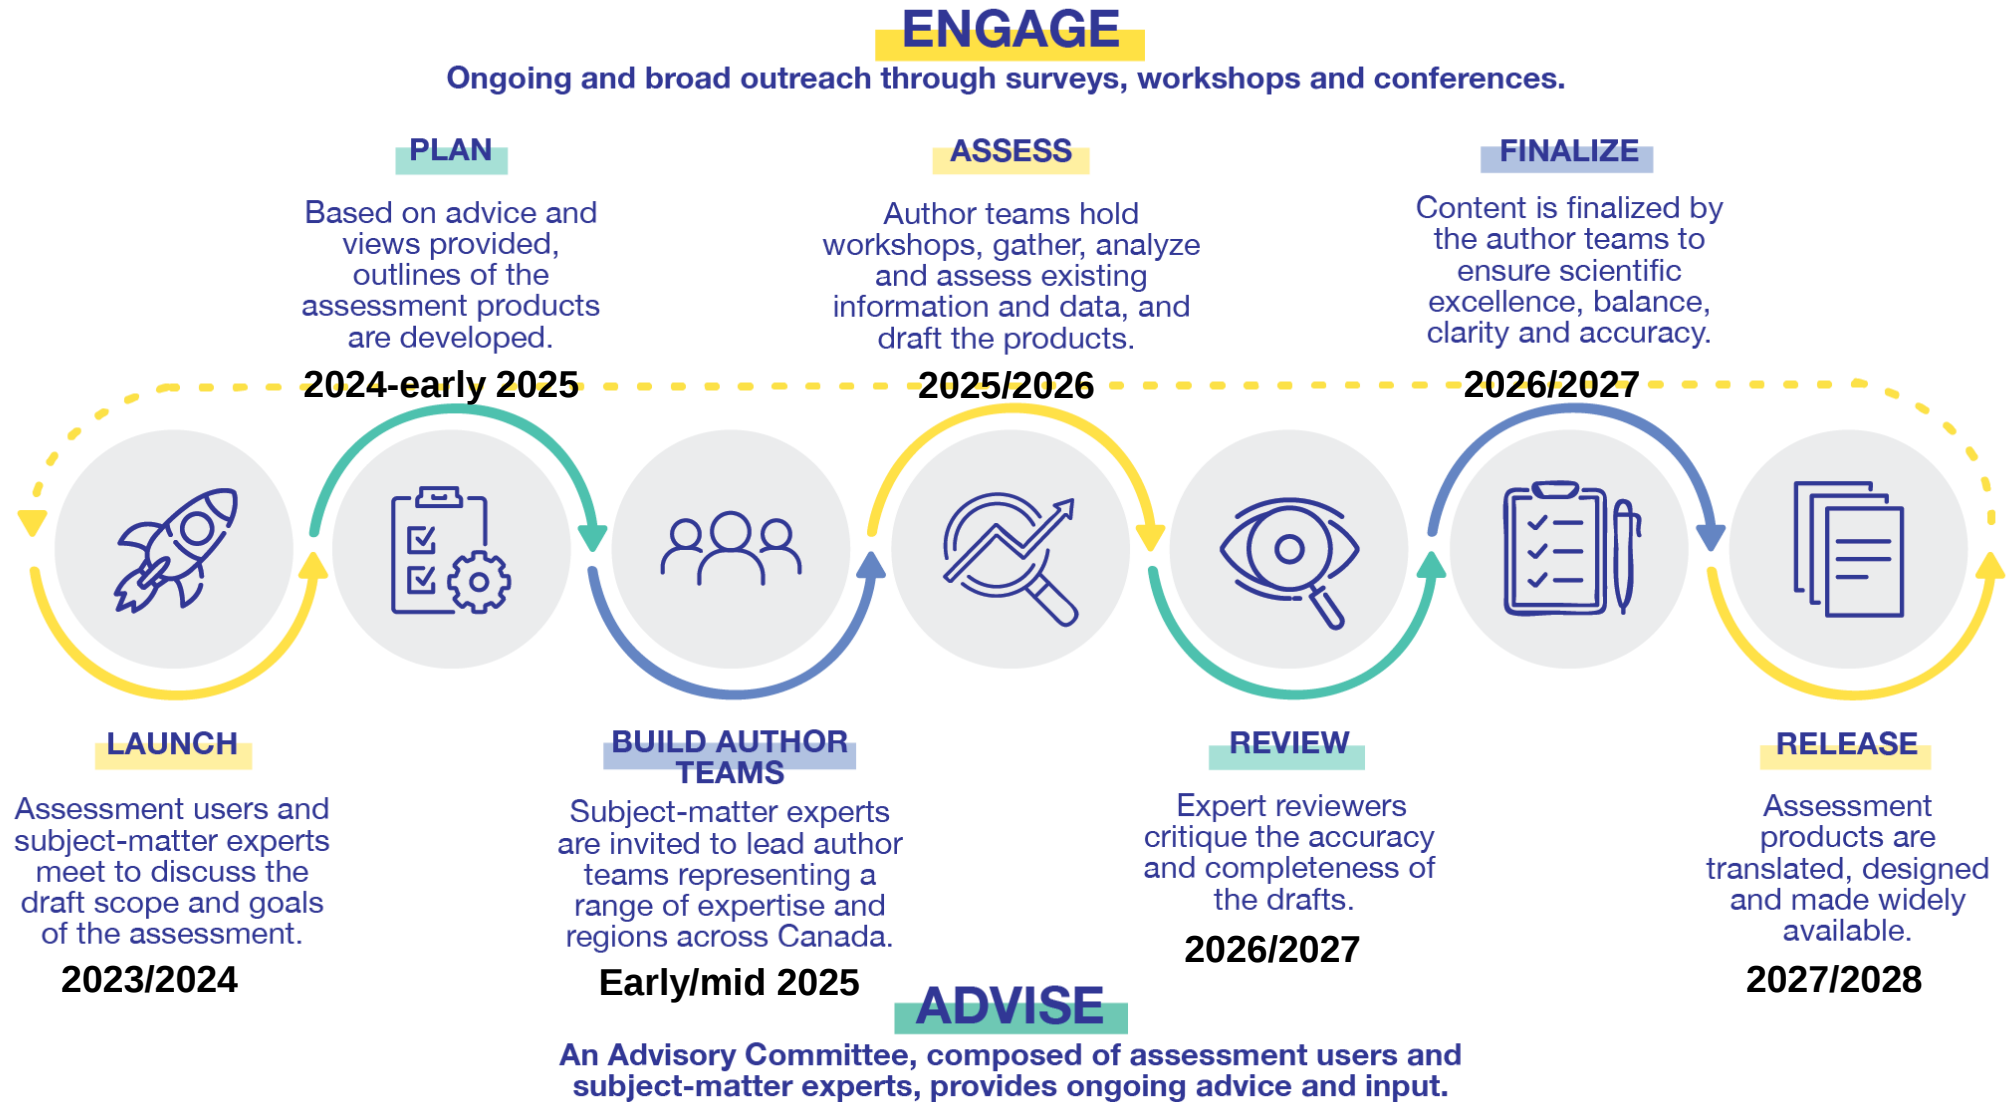

*“As a reference to inform a **climate change adaptation strategy** for a local government”*

*“I have used findings to prepare background for **presentations and in developing targeted products** for clients”*
